Read more Gaming just reached the next level of thrill Buy now Immerse into what you're watching Buy now Still have questions? About 5G 5G Upgrade Plans What is 5G technology? 5G is the 5th generation mobile network, which is the latest in mobile telecommunication technology. Jio is deploying the most advanced version of standalone 5G, which has zero

dependencies on the existing 4G network. Other operators are deploying a non-standalone version of 5G that operates on their 4G core, making Jio True 5G far superior. With standalone 5G, Jio can deliver powerful, new 5G services such as low latency connectivity, massive machine-to-machine communication, 5G calls, edge computing, network slicing, and the metaverse. Why should I switch from 4G to 5G? When comparing 5G vs 4G, Jio's True 5G stands out by offering unmatched coverage, capacity, quality, and affordability. Here's how 5G will transform your digital experience: Standalone 5G architecture: World's most advanced 5G network with zero dependencies on 4G infrastructure. Low latency, machine-to-machine communication, 5G calls, edge computing, and network slicing. Far superior to 4G-based non-standalone networks being launched by other operators. Largest and best mix of spectrum: The most suitable mix of wireless spectrum for 5G in India, spanning the 700 MHz, 3500 MHz, and 26 GHz bands, provides Jio True 5G a distinct advantage. Jio is the only operator with a 700 MHz low-band spectrum, ensuring deep indoor coverage. Carrier Aggregation: Seamlessly combines 5G frequencies into a powerful "data highway" using advanced technology.

Enables users to enjoy blazing speeds up to 1 Gbps with ultra-low latency and the best indoor and outdoor experience. With so much going for Jio True 5G, all you need is a compatible 5G device to step into the future of connectivity. When is Jio True 5G launching in my city/area? Jio True 5G has now covered most of India! Open this link to check all the places across India where True 5G is available. What is Jio's 5G Wi-Fi service?

To enable 5G-for-all, we are launching Jio True 5G-powered Wi-Fi services in high-footfall areas such as educational institutions, religious places, railway stations, bus stands, commercial hubs, and other locations. We have already launched True 5G-powered Wi-Fi services in the temple town of Nathdwara, Rajasthan to help users to experience Jio's True 5G service first-hand.

True 5G-powered Wi-Fi services are already available in Mahakaleshwar Jyotirlinga, Shri Mahakaal Mahalok, Guruvayur Temple and Maa Kamakhya Temple premises. We will keep you informed as we cover more locations with Jio True 5G-powered Wi-Fi services.

Have a 5G-compatible handset, and my city has a Jio 5G network. Am I eligible for the Jio True 5G plan? The Jio True 5G plans apply only to users with 5G devices, located in cities where Jio True 5G services are available and have a valid active prepaid (more than 2 GB/day) or postpaid rental with a 349 or above plan. If you are a prepaid customer with a less than 2 GB/day plan, you can upgrade with the following add-on recharges to enjoy 5G internet. 1 GB / day customers 101 Add-on Plan: Prepaid customer with a 1 GB/day plan can recharge with 101 to get a Jio True 5G plan.

1.5 GB/day plan 51 Add-on Plan: Customers with plan validity up to 1 month can recharge with 51 to get a Jio True 5G plan. 101 Add-on Plan: Customer with plan validity > 1 month & <= 2 months, can recharge with 101 to get

Jio True 5G plan. 151 Plan: Customer with plan validity > 2 months & <= 3 months, can recharge with 151 to get Jio True 5G Plan.
