Know more. Get better. How to submit feedback How to reset JioPC password How to log out from JioPC Get JioPC FAQ What is JioPC? JioPC is a virtual desktop service. It is like having a computer in the cloud, delivered over the internet. You can use it through your Jio Set-Top Box (STB) by connecting a keyboard and mouse. Why should I get a JioPC? JioPC will be your reliable partner for work, learning, and entertainment. It is ideal for browsing, running productivity apps, educational tools, attending online classes, and more. It is affordable, requires low upfront cost, and eliminates maintenance or upgrade worries since everything is managed in the cloud. Plus, your data remains secure even if your set-top box is damaged or replaced. What do I need to start using JioPC? To start using a JioPC, you

just need:

A JioFiber or JioAirFiber connection with a set-top box (STB). A keyboard and mouse. An active JioPC subscription. What is the configuration of JioPC? JioPC is launched with the following configuration:

CPU: 4 CPU RAM: 8 GB Storage: 100 GB Cloud Storage Usage: Unlimited Operating System: Ubuntu (Linux) This setup is ideal for browsing, online learning, programming, design and productivity applications. Do I always need internet connectivity to use JioPC? Your JioPC is a virtual desktop that is running in the cloud and streamed to you over the internet. You will be disconnected from the virtual desktop if you lose internet connectivity. Your work will continue to be securely stored on the cloud, and you can reconnect within the idle time (15 mins) to pick up from where you left off. After the idle time passes, your JioPC virtual desktop will be shut down and all unsaved work will be lost.
